

ASPA FLEX
WEBINAR SERIES

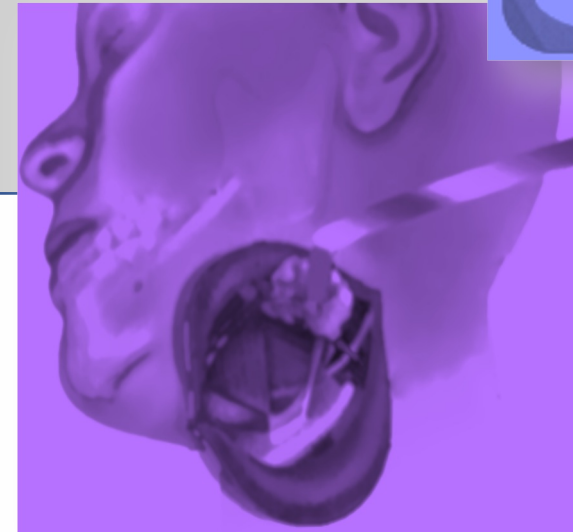

3rd ASPA FLEX-2 Webinar

Focused Learning Education Experience

Anaesthesia for ENT surgeries in children

Post-webinar report
Prepared by Dr Vibhavari Naik

March 20, 2022
1700H Singapore time

Background

- ENT surgeries are the commonest type of surgeries done in children. They are diverse and sharing of the airway makes it more challenging.
- There have been many advances and the use of newer technology in this field and we aimed to cover this.
- Since ENT endoscopy was assigned a separate webinar, we decided to cover other important aspects on this topic.
- Dr Rebecca Jacob (India) - ASPA education committee, Dr Vibhavari Naik (India) - the webinar lead, and Dr Josephine Tan (Singapore) - the co-moderator and Dr Teddy Fabila (Philippines) – the webinar IT Support contributed ideas to organise this webinar as per ASPA requirements.

Webinar speakers

- We began with Dr Rufinah Teo describing the essential aspects of anaesthetizing children for cochlear implants. She also covered the anaesthetic concerns of these children for MRI.
- Dr Victor Alarva III discussed the surgical options for tonsillo-adenoidectomy and its implications on postoperative pain. This topic was included as many anaesthesiologists are not aware of this.
- And finally, Dr Anita Shirley spoke on a very challenging clinical scenario – the retropharyngeal abscess. She highlighted the mistakes that should be avoided while anesthetizing these children.
- We had ample time for discussion in Q and A session and most queries of the audience were addressed.

20th March 2022

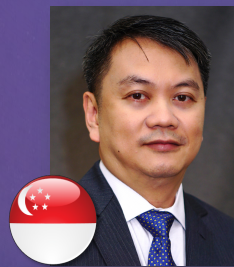

UCT SGP IND KOR/JPN THA TUR
0900H | 1700H | 1430H | 1800H | 1600H | 1200H

Speakers:

Dr Rufinah Teo

“Essentials in anaesthesia for cochlear implant surgeries”

Dr Victor Alarva III

“Tonsillectomy and adenoidectomy – Surgical techniques and post-tonsillectomy pain management”

Dr Anita Shirley

“Mistakes to avoid when anaesthetising a child with retropharyngeal abscess “

Moderators:

Dr Vibhavari Naik
Webinar LEAD

Dr Josephine Tan
Co-Moderator

Dr Teddy Fabila

Post webinar survey results

ASPA-FLEX Webinar delivered information I expected to receive .

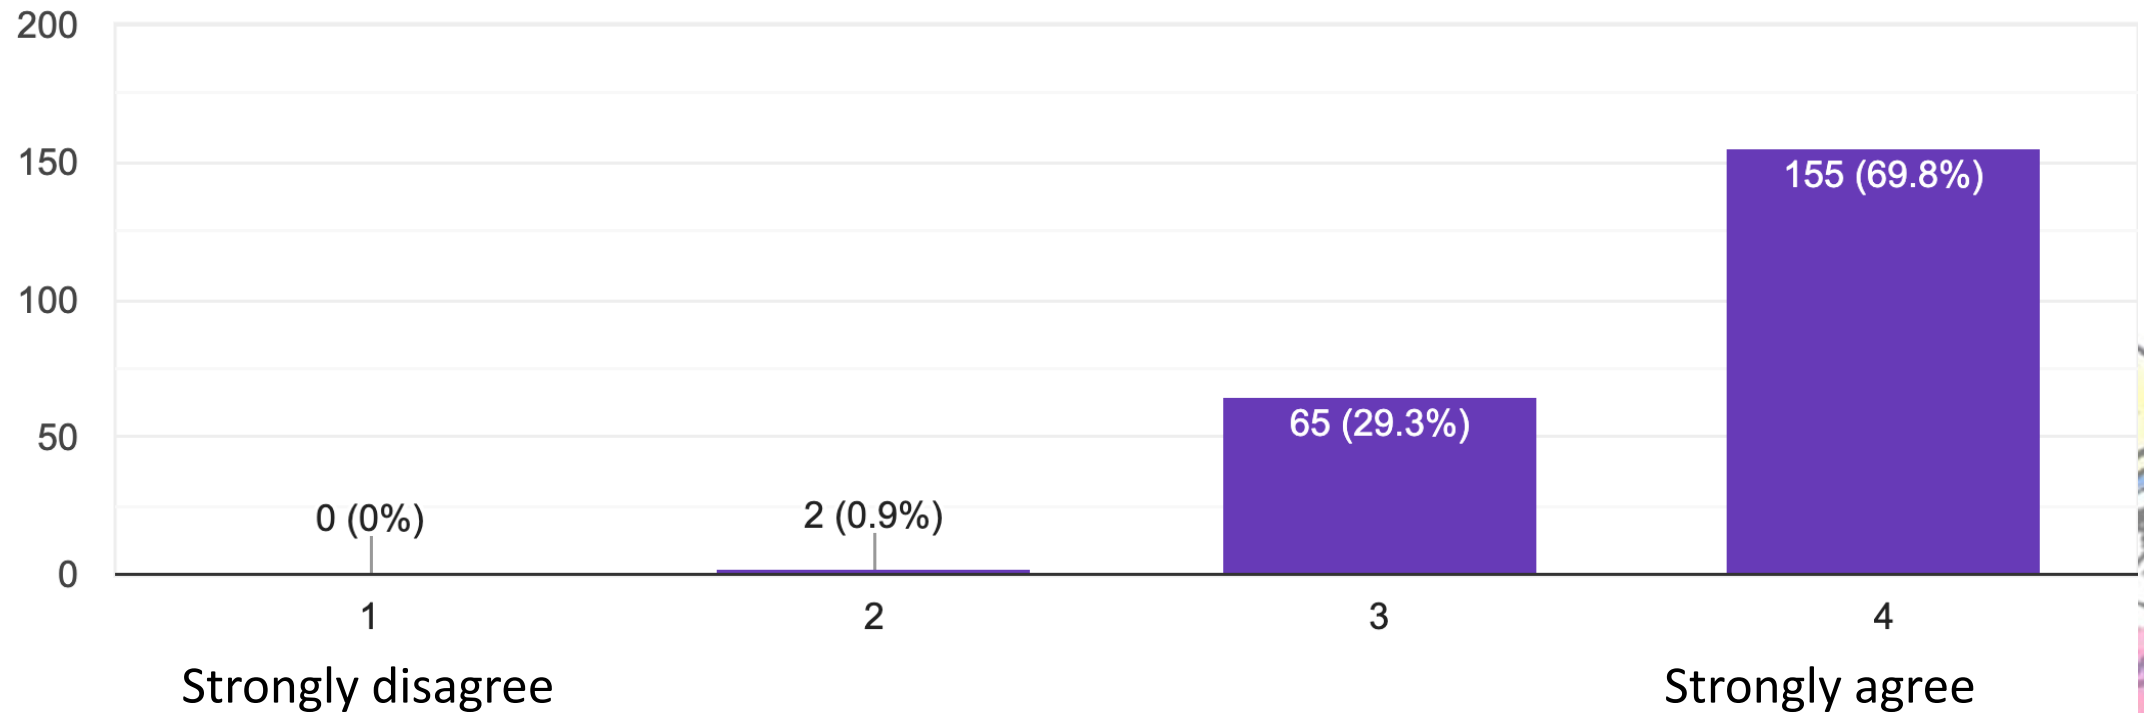

222 responses

Post webinar survey results

I gained new knowledge

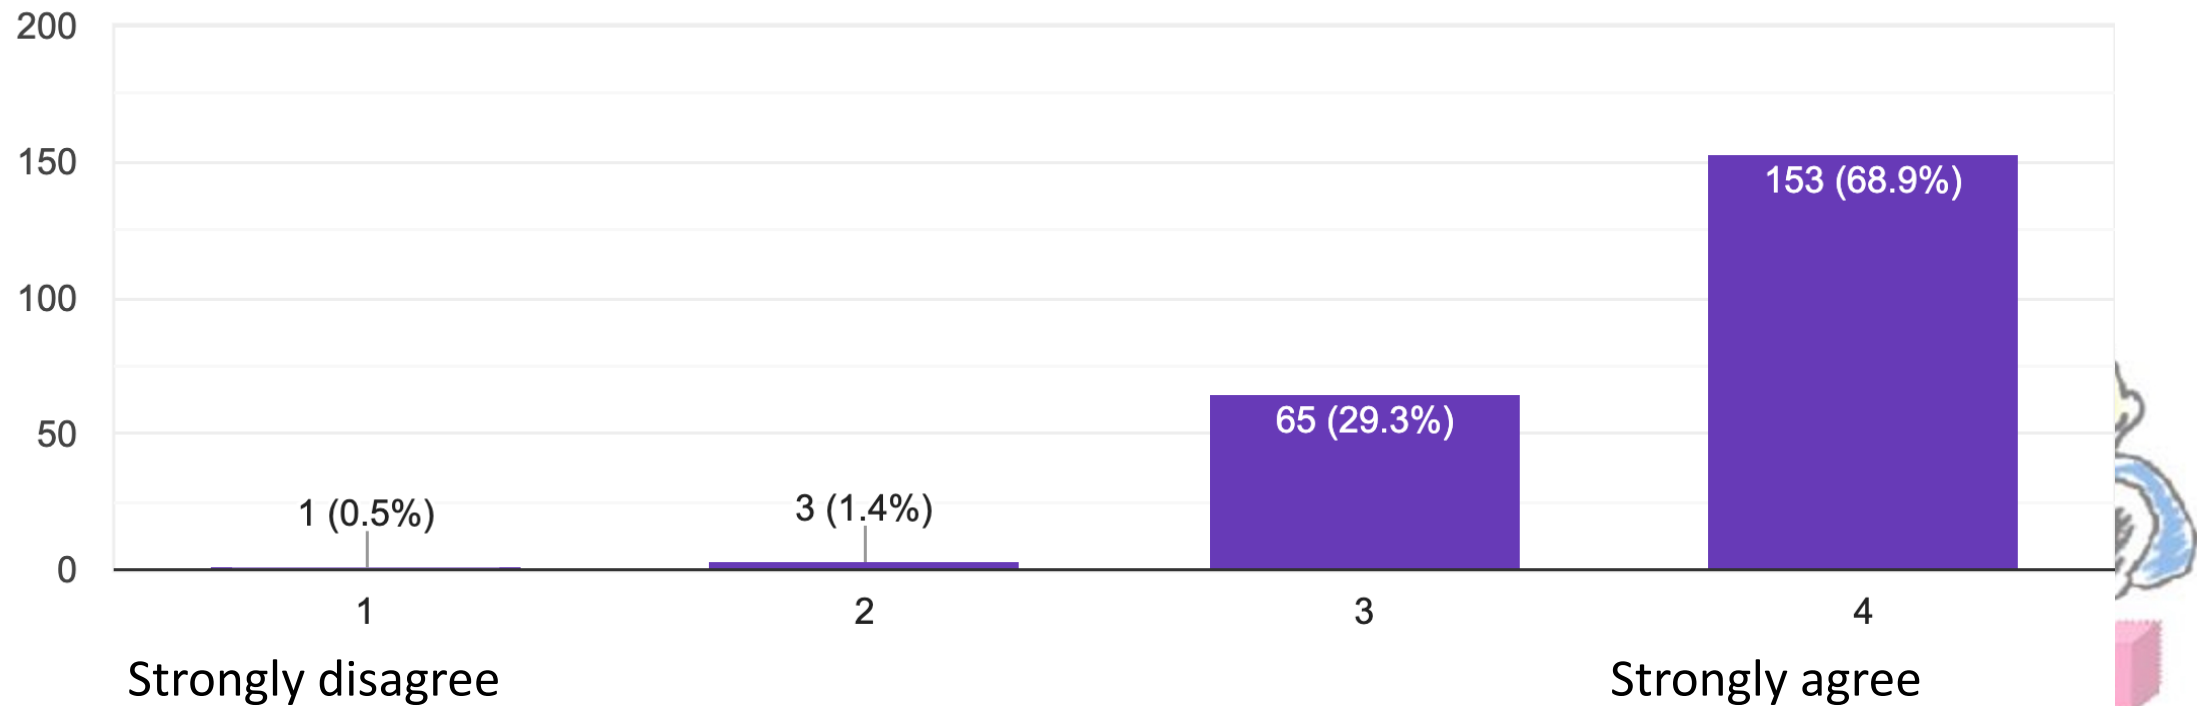

222 responses

Post webinar survey results

I plan to apply what I learnt from this webinar.

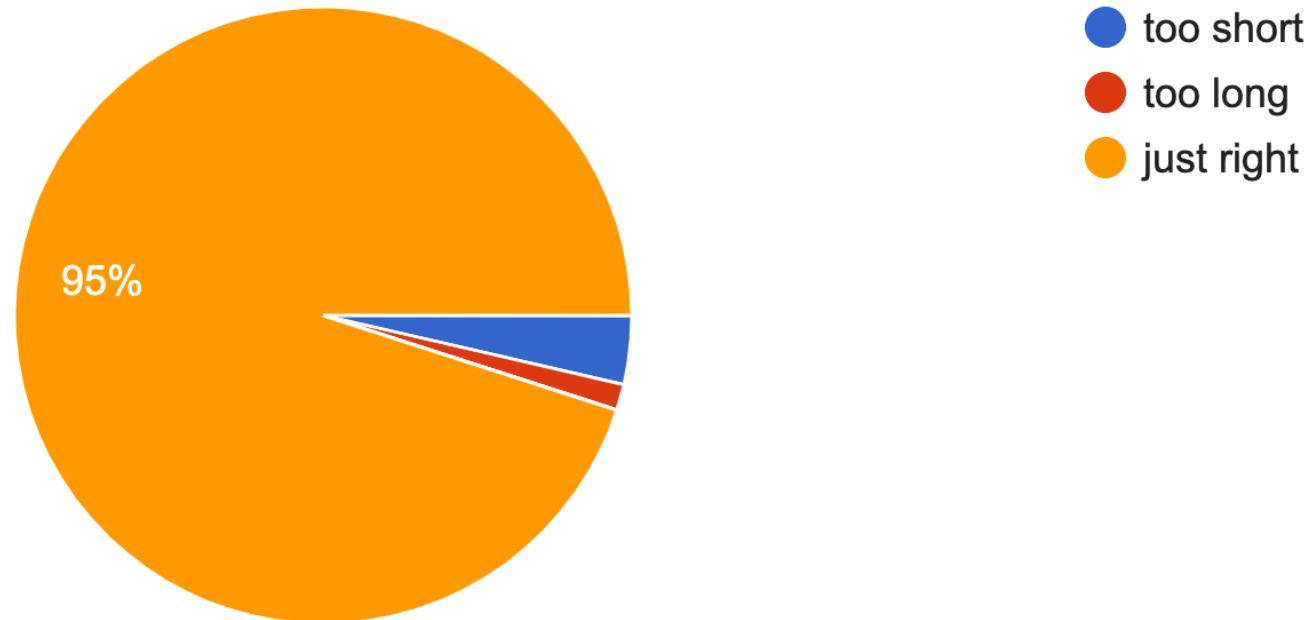

222 responses

Post webinar survey results

The duration of the webinar was:

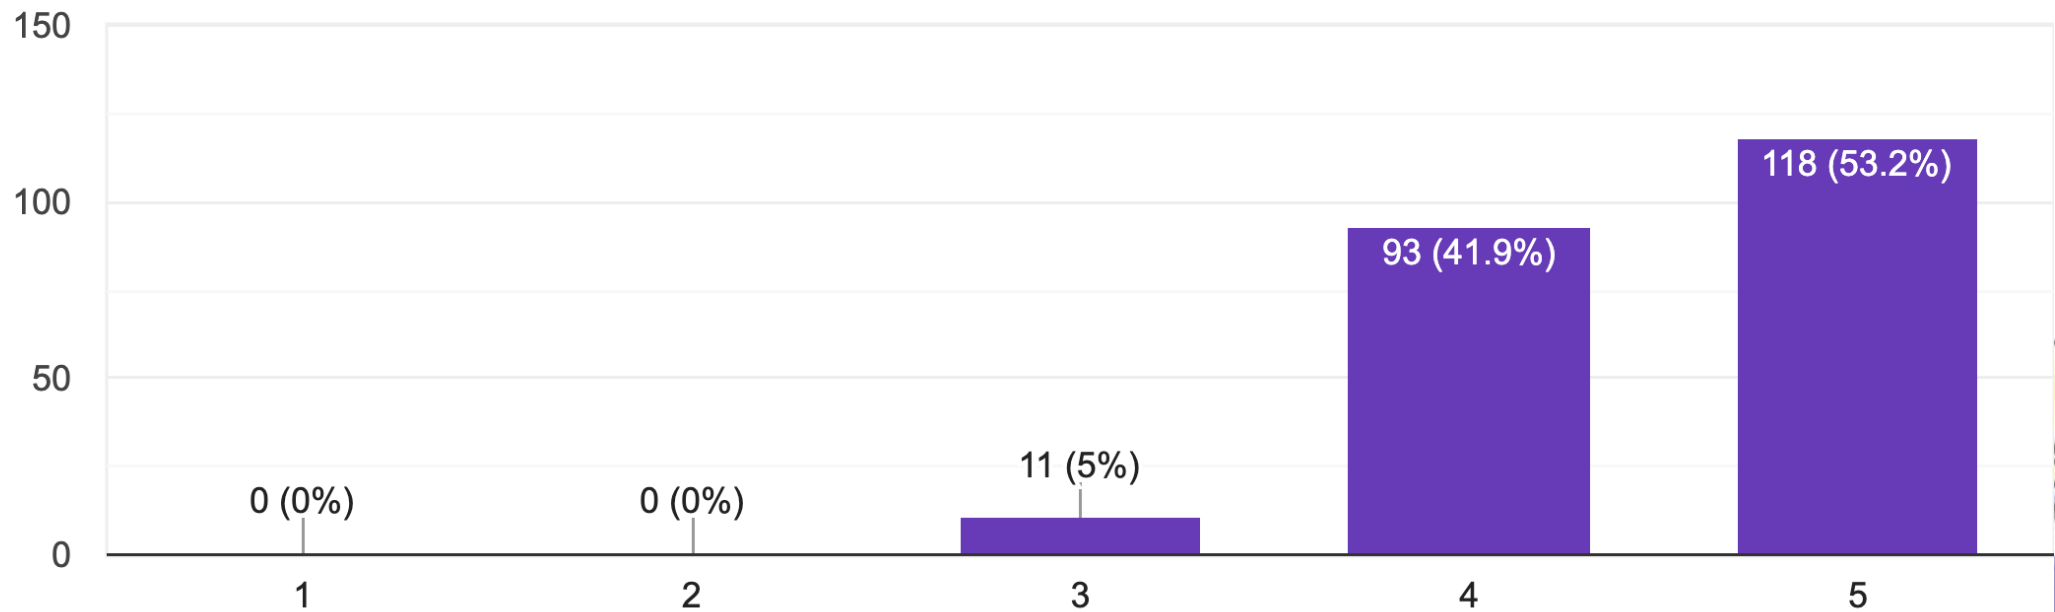

222 responses

Post webinar survey results

The talk by Dr Rufinah Teo on “Essentials in Anaesthesia for Cochlear Implant Surgeries”

222 responses

Did not meet my expectations

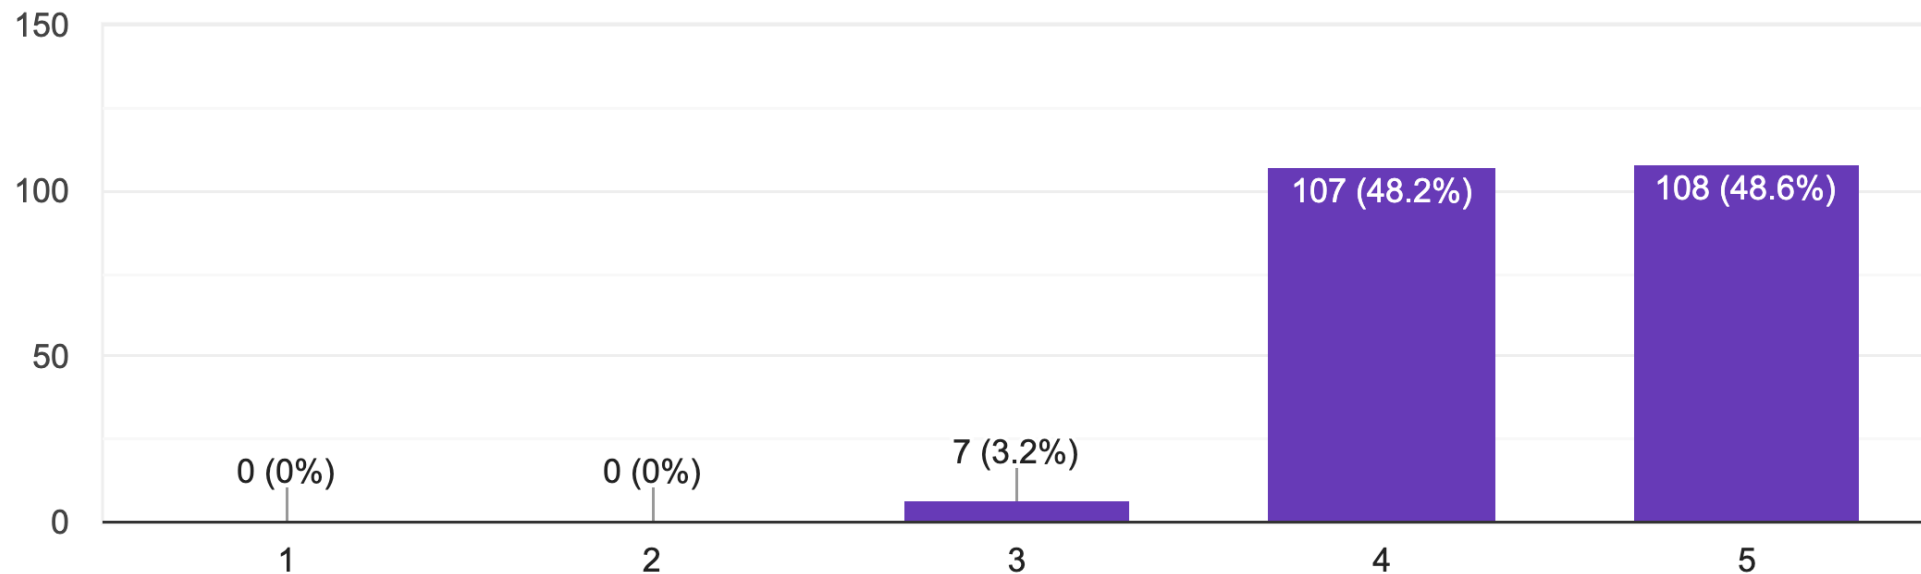

Greatly meet my expectations

Post webinar survey results

The talk by Dr Victor A. Alarva III on “Tonsillectomy and Adenoidectomy – Surgical Techniques and Post-tonsillectomy Pain Management”

222 responses

Did not meet my expectations

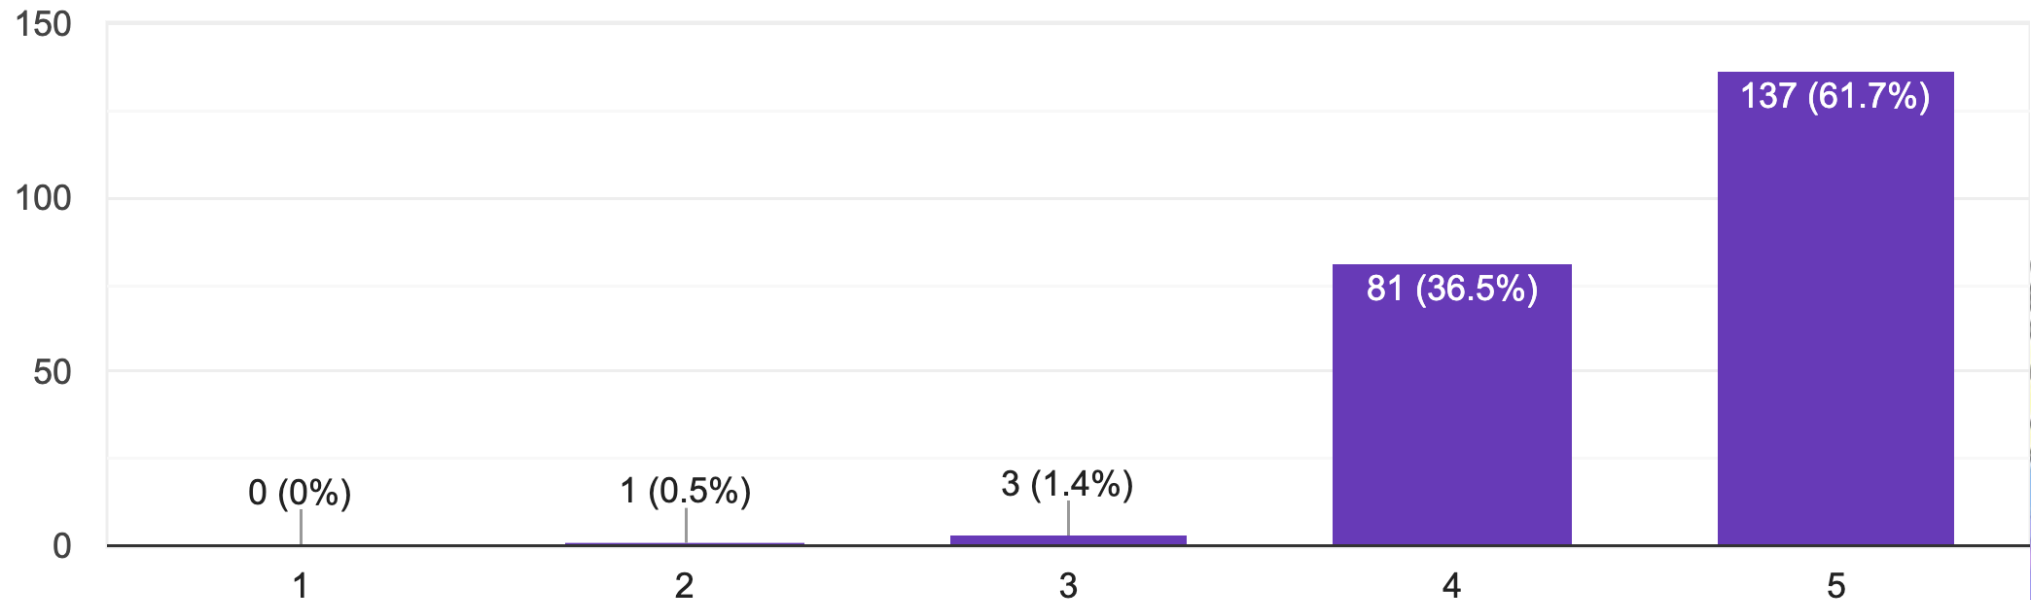

Greatly meet my expectations

Post webinar survey results

The talk by Dr Anita Shirley Joselyn on “Mistakes to be avoided in anaesthetizing a child with retropharyngeal abscess “

222 responses

Did not meet my expectations

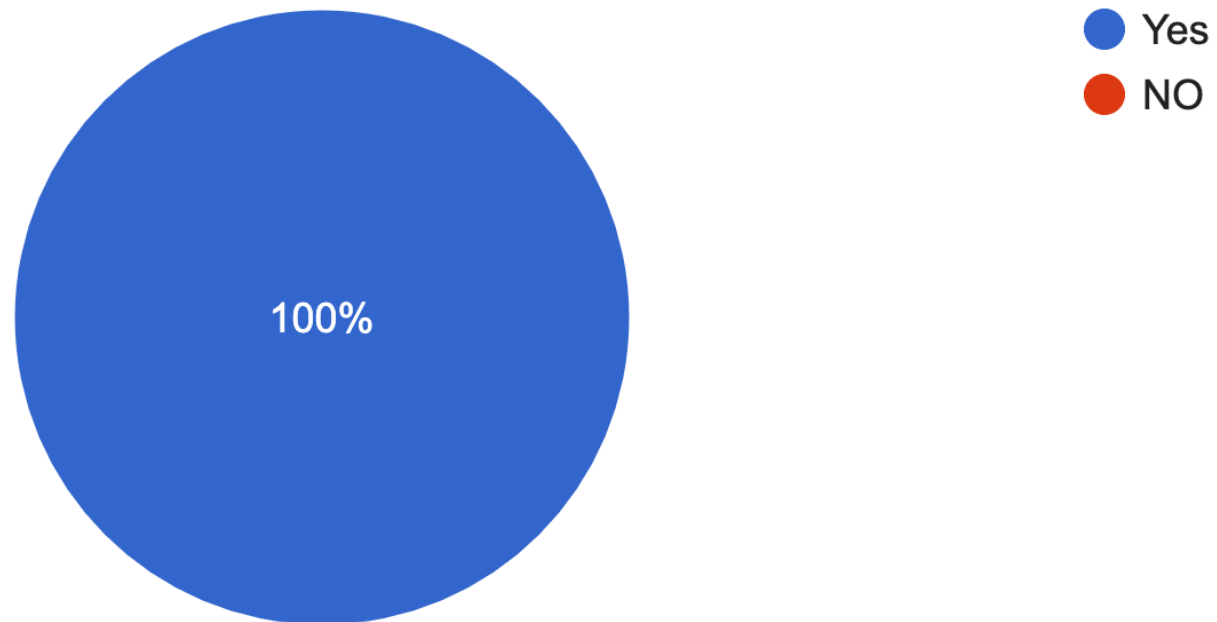

Greatly meet my expectations

Post webinar survey results

I would recommend this webinar series to fellow healthcare professionals.

How would you rate today's webinar?

222 responses

What is the best part of the webinar?

- Question and answer
- Everything
- retropharyngeal abscess
- Poll question quite interactive
- Lecture on tonsillectomy and adenoidectomy
- Polling questions at the beginning were very efficient, both for timing and drawing attention
- Essential anesthesia for cholear implant
- Pre-presentation answer and question sessions
- The panel discussion

What is the best part of the webinar?

- The talk by Dr Anita Shirley Joselyn on “Mistakes to be avoided in anaesthetizing a child with retropharyngeal abscess
- Anaesthetic management for retropharyngeal abscess
- The duration and concise topics , punctuality.
- To find how others are managing
- Topic abouts "Essentials in Anaesthesia for Cochlear Implant Surgeries”
- Q&A session ...
- Practical information relevant to clinical practice
- Focus on clinical issues
- Third talk by Dr Anita is really good
- The discussion on retropharyngeal abscess
- MCQ to answer
- Start of each lectures when they give interesting quiz for the topic to be discussed
- During quizzes
- Lectures followed by q&a session
- Short and sweet

What is the best part of the webinar?

- I could learn what doctors are doing to perform adequate anesthesia for children undergoing ENT surgeries.
- Q &A
- Dr Victor Alarva
- Talks were awesome
- Polling
- All the parts are equally excellent
- The duration and timing of the webinar are just right
- All speakers lectured just the right amount of information to keep me interested
- Time management
- updated
- Topics presented
- Easily communicable
- Question and answer session

What is the best part of the webinar?

- Surgical techniques by dr Alarva
- The polls and the crisp content
- Topic of Dr Aparva
- Lectures and Q and A
- Q&A - discussions
- all
- The summary at the back of each lecture
- The speakers are not only anesthetist
- Clear good presentation
- Informative
- Polls / Q+A session
- Clinical application rather than theory
- Talk by Dr Anita Shirley

How can we improve ASPA-FLEX webinar series?

- More Q&A portion as well as incorporate upto date data
- Just continue
- Routine webinar
- Live demonstrations via video feed if possible
- It's already excellent but a skills demo would be nice
- That is all right
- Pre lectures questions and presentation simple skills
- Covering multitopics related to critical or emergency situations
- By advertising more
- Practical tips for remote areas

How can we improve ASPA-FLEX webinar series?

- can explore more on difficult airway management in pediatric population
- Recording of simulations / techniques
- I think it will be with social media
- Keep it up
- More interaction with the audience and more talks
- It is perfect! 😊
- At times speech was disrupted. Second speaker a little boring.
- As it is now
- I would like to listen to what the presenters are doing in their hospitals rather than information from textbooks and articles.
- More time for interaction
- Good enough
- No suggestion

How can we improve ASPA-FLEX webinar series?

- Keep up the good work
- Share more personal experience or techniques.
- So far so good
- More questions
- More video presentation
- Each speaker should be from a different country
- good enough
- All is good
- Better net connection
- Perfect except for s/t internet audio problem
- If possible to include more talks
- Have a post attendance quiz
- More webinar per month

How can we improve ASPA-FLEX webinar series?

- More quiz
- Mixture of primary team involvement enhance the understanding of procedures.
- Include also invited speaker from all over the world as to sharing more knowledge
- Add new topics updates.
- Cont to have poll
- please answer to d queries asked in d q and answer box .
- Better clarity of talk (internet issues)
- Improve on the technical glitches.
- Variety of topics
- Section like pre& post test
- Have a more frequent webinar
- Mixture of primary team giving their talk and opinion will enhance understanding and improve anaesthesia care

How can we improve ASPA-FLEX webinar series?

- Invite more speakers
- With more visuals
- ..
- Continue with focussed topics
- Case scenarios may be added
- Make it longer for q n a
- More new topicz1
- webinar series is good enough
- Lecture on anesthetic considerations in patients with muscular weakness/ dystrophy
- Longer duration
- Organizer more courses
- Please include case scenario.
- by giving us the polling

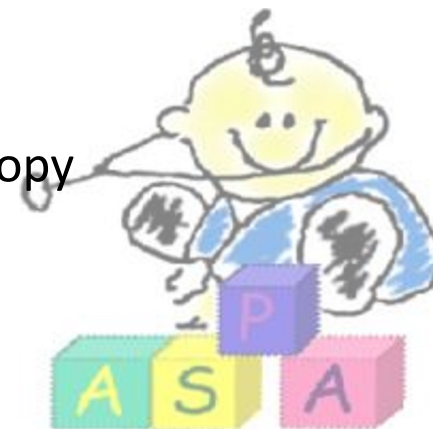

How can we improve ASPA-FLEX webinar series?

- Present some case scenario if possible
- More regular series
- More interactive session
- Problem Base or Case based discussion.
- Give more clinical teaching
- Kindly keep up the volume of the speaker. At times they are not properly audible.
- Problem Base or Case Base discussion
- More case base discussion
- More updated topics regarding recent developments in the field of pediatric anesthesia
- By giving us problem based learning case
- Let's here paediatric anaesthesia experience from wfrica
- Good enough
- Already good

What other topics would you like to be discussed in subsequent webinars?

- Paediatric airway surgery
- Neuro surgery for pediatrics
- Infants with cardiac problems for noncardiac procedures
- Around covid
- Advancements in videolaryngoscopy
- Pediatric hypothermia
- Pediatric anesthesia crises/emergencies
- Corneal transplant anesthesia
- Shared airways eg in case of handling paediatric patient coming for tracheobronchoscopy
- COVID / respiratory management during anesthesia
- Pediatric airway
- Congenital heart disease

What other topics would you like to be discussed in subsequent webinars?

- Airway problems
- Covid Testing Guidelines for Surgery and Procedural Sedation
- Anaesthesia management in Retinopathy of Preterm
- Regional anesthesia in pediatric patients
- Paed periop IV fluid therapy
- Difficult airway in paediatric
- Bariatric surgery
- General anaesthesia
- No comments
- Management of chronic pain
- Pedia neuraxial
- Neurological diseases
- Anaesthesia for neonates surgery

What other topics would you like to be discussed in subsequent webinars?

- Perioperative fluids
- Craniostoma
- TIVA/tci
- Pediatric burn patients
- Anesthesia for pediatric ophthalmology surgery
- TIVA
- updates
- Difficult airway in pediatrics
- Pediatric emergencies pitfalls
- Pediatric covid for surgery
- Fetal surgery
- Post Anesthesia complications
- management of eye surgeries in pediatric patient

Recommendations

- I think it is prudent to have one surgeon or other allied branch person as one of the speakers for the webinars as it improves the perspective on the topic.
- I feel 2 - 3 poll questions for each talk should be included, as they help in improving the audience interaction.
- I thank the ASPA education committee for giving me this opportunity and look forward to contributing more to whatever capacity deemed appropriate.

THANK YOU
