# ASPA-FLEX Webinar delivered information I expected to receive .

110 responses

# I gained new knowledge

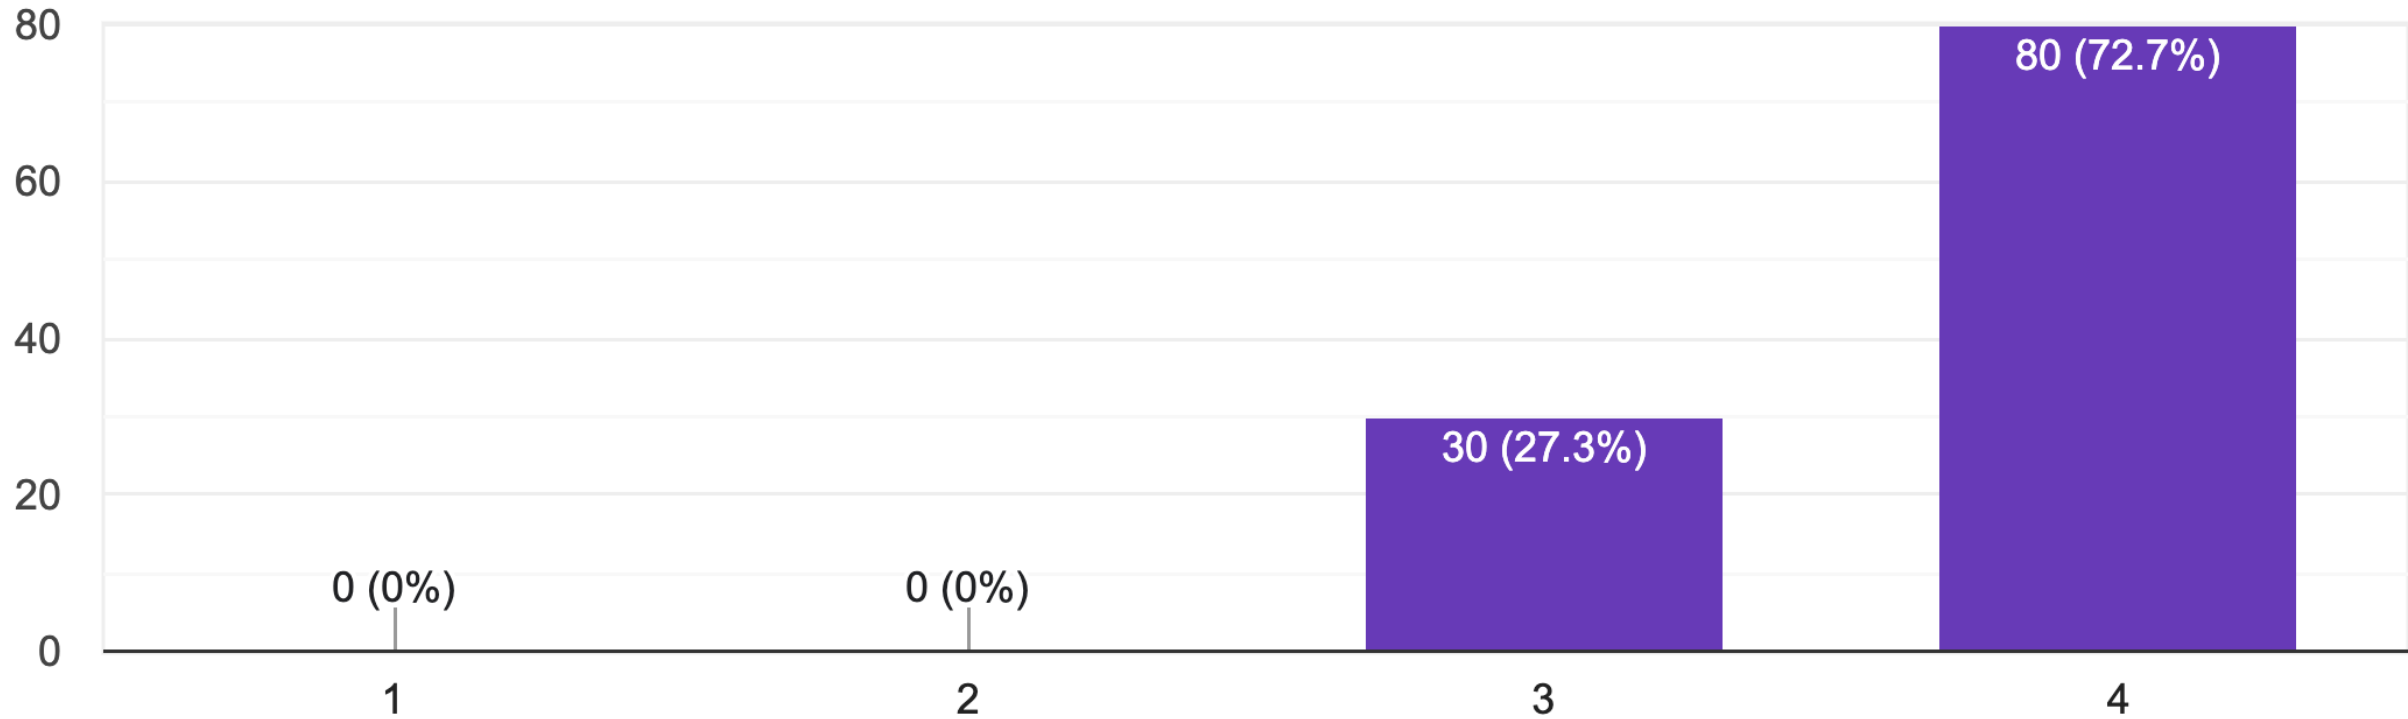

110 responses

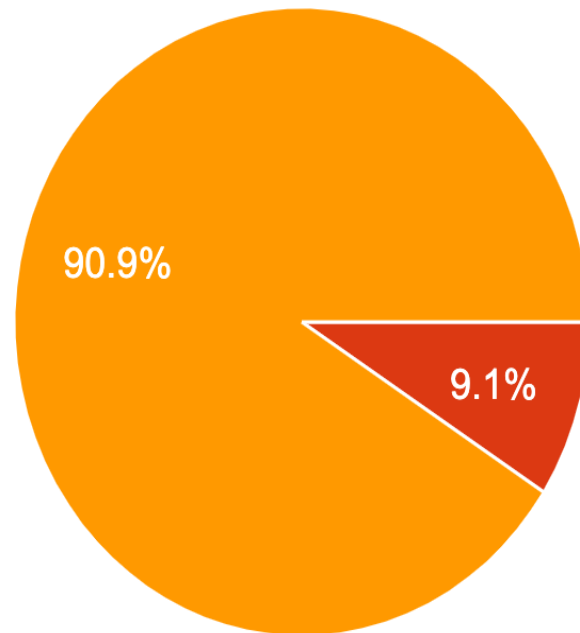

I plan to apply what I learnt from this webinar.

110 responses

The duration of the webinar was:

110 responses

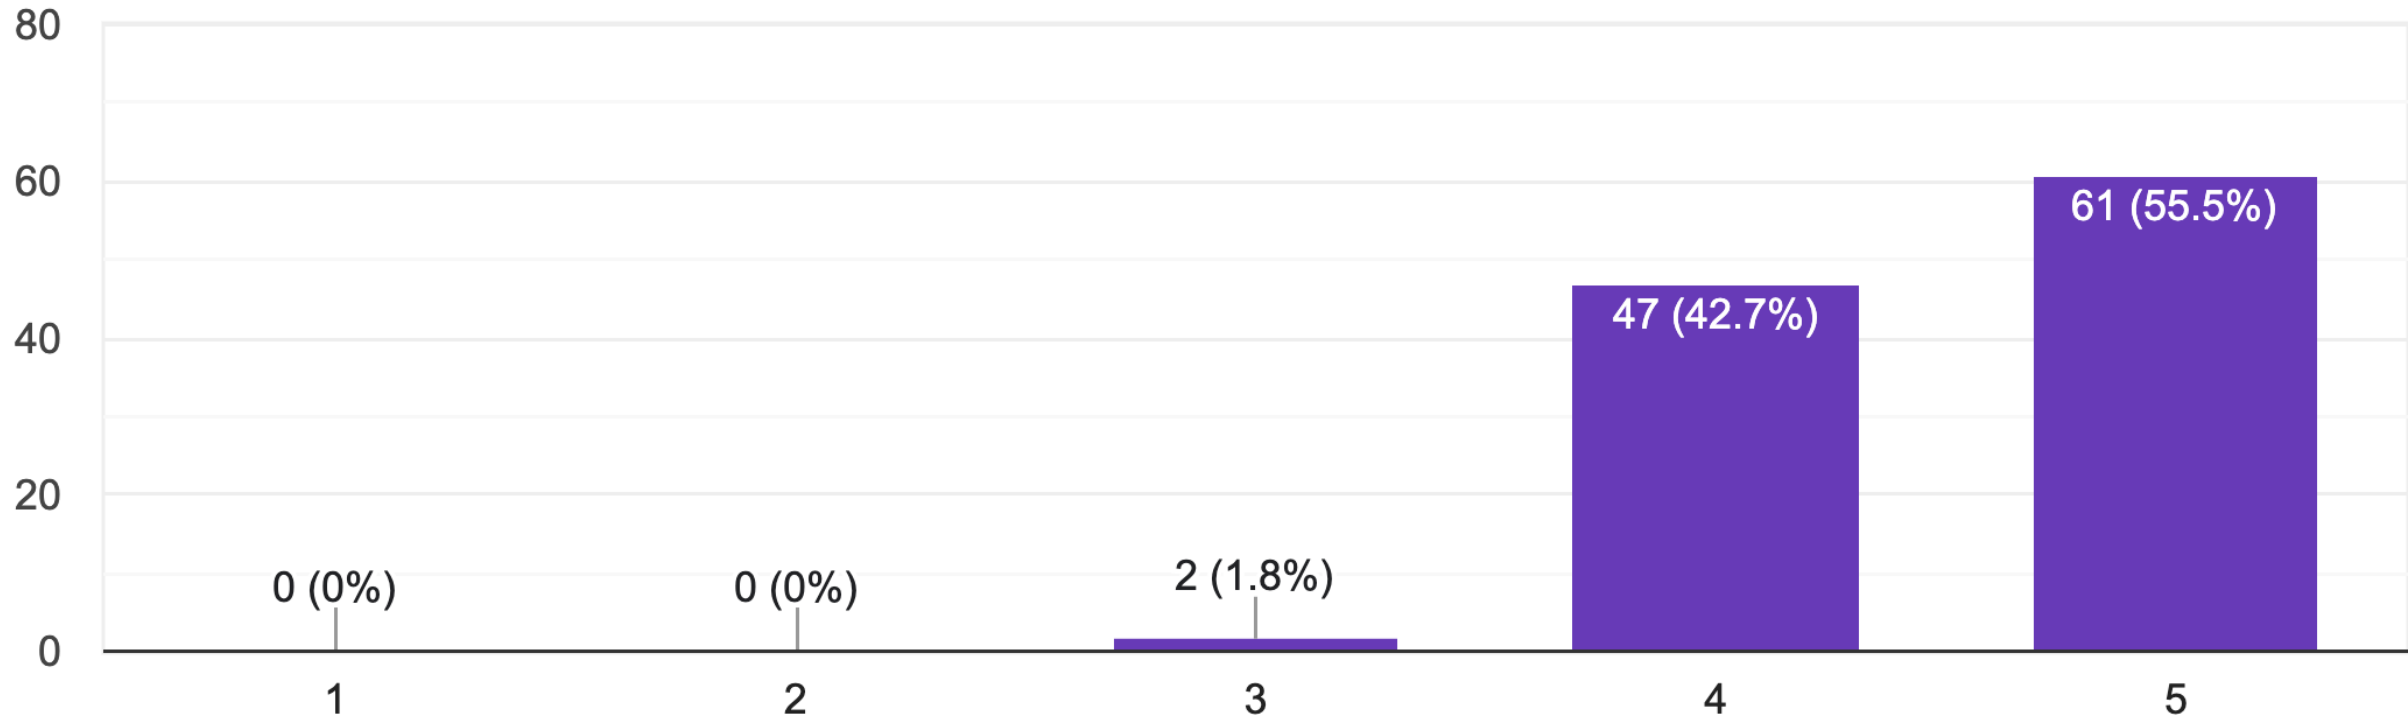

- too short
- too long
- just right

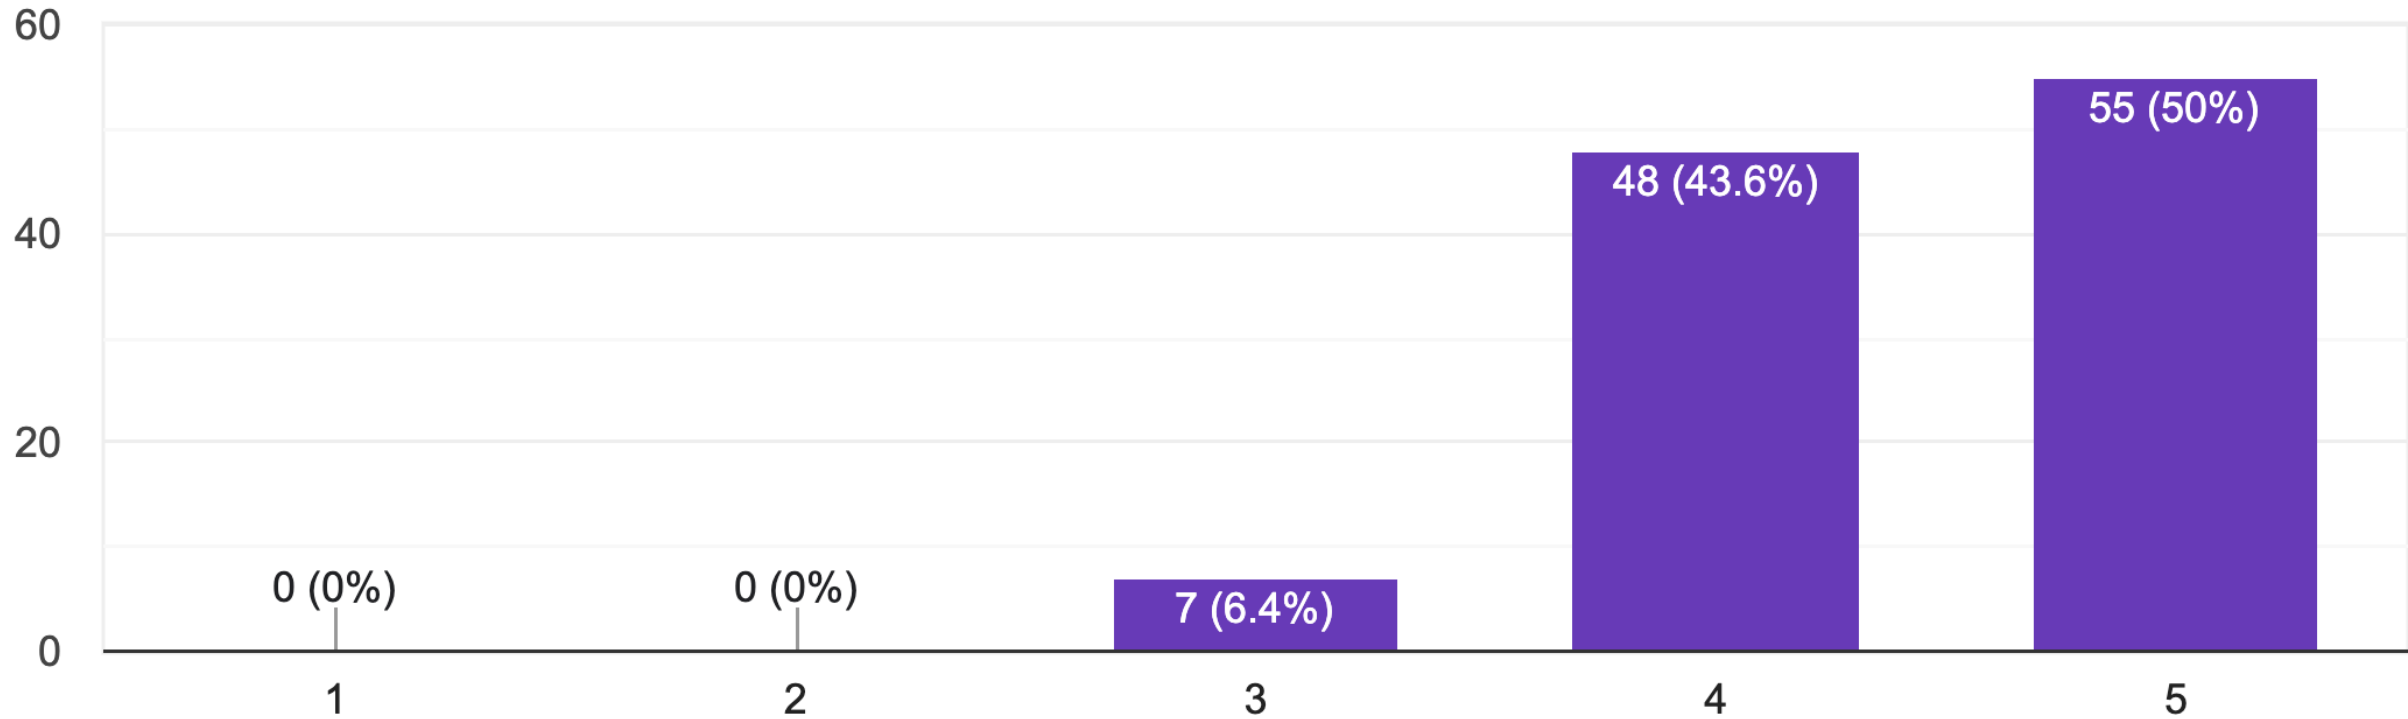

# The talk by Dr Canan BOR on Perioperative management of an infant with neuroblastoma

110 responses

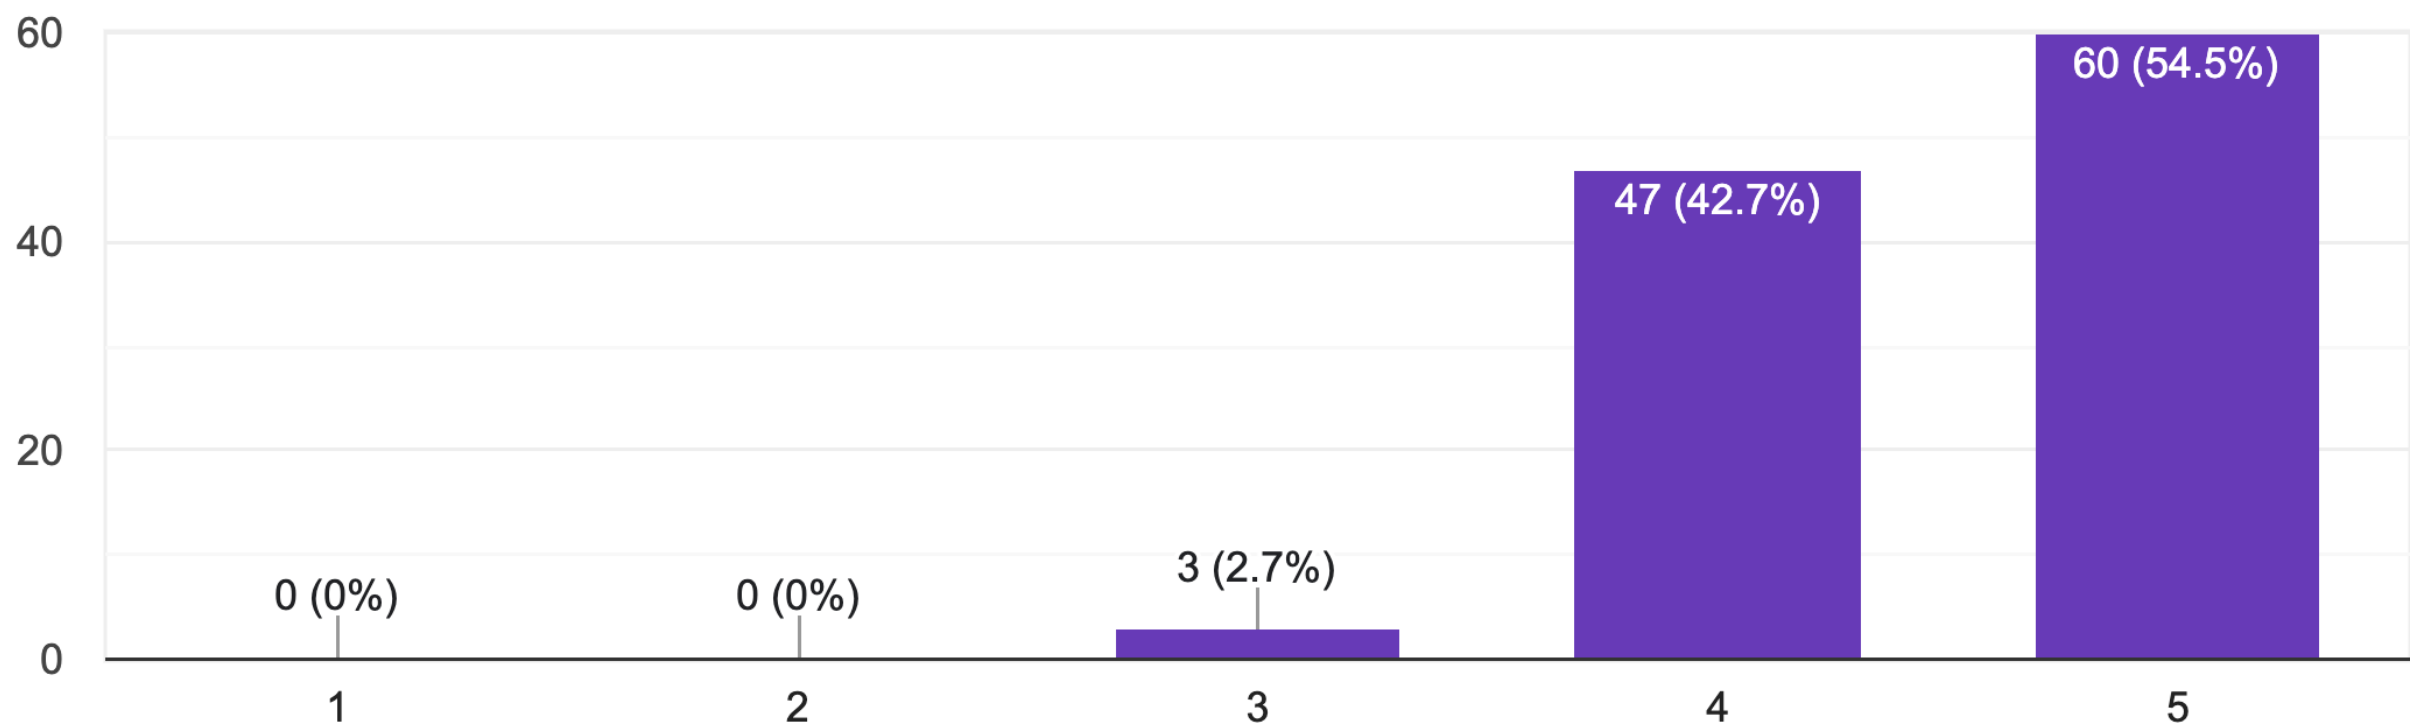

# The talk by Dr Lucas OPITZ on Iterative anaesthesia in Radiation Therapy Centers

110 responses

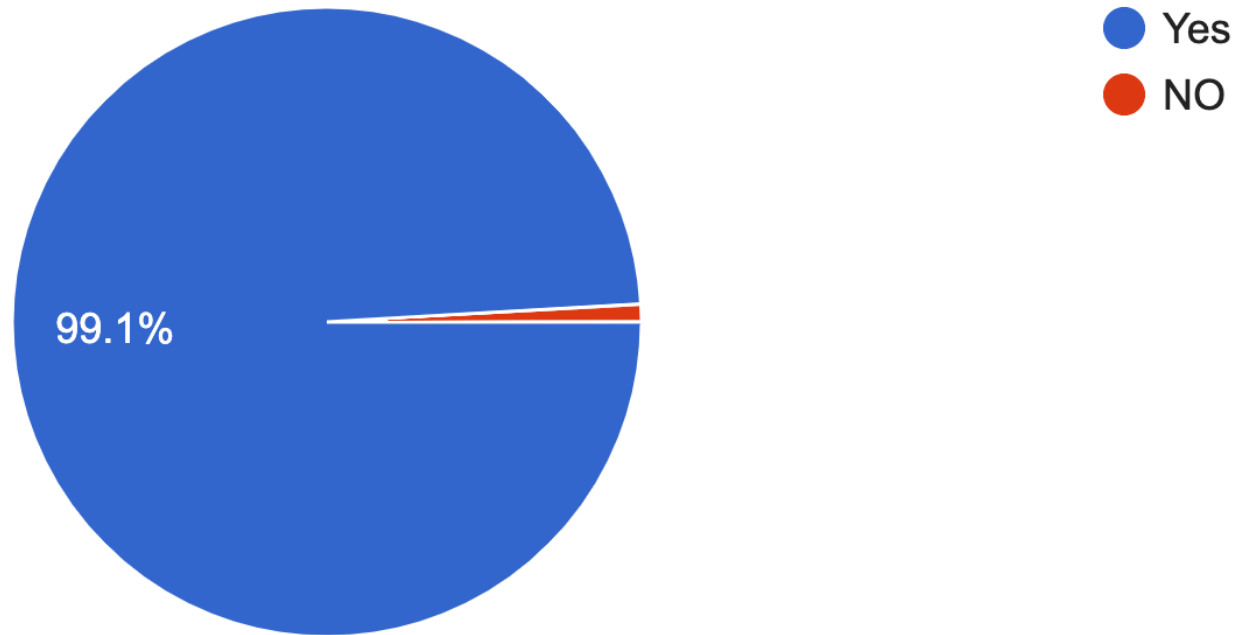

## The talk by Dr Jeson R DOCTOR on Postoperative management of children after major tumour excision

110 responses

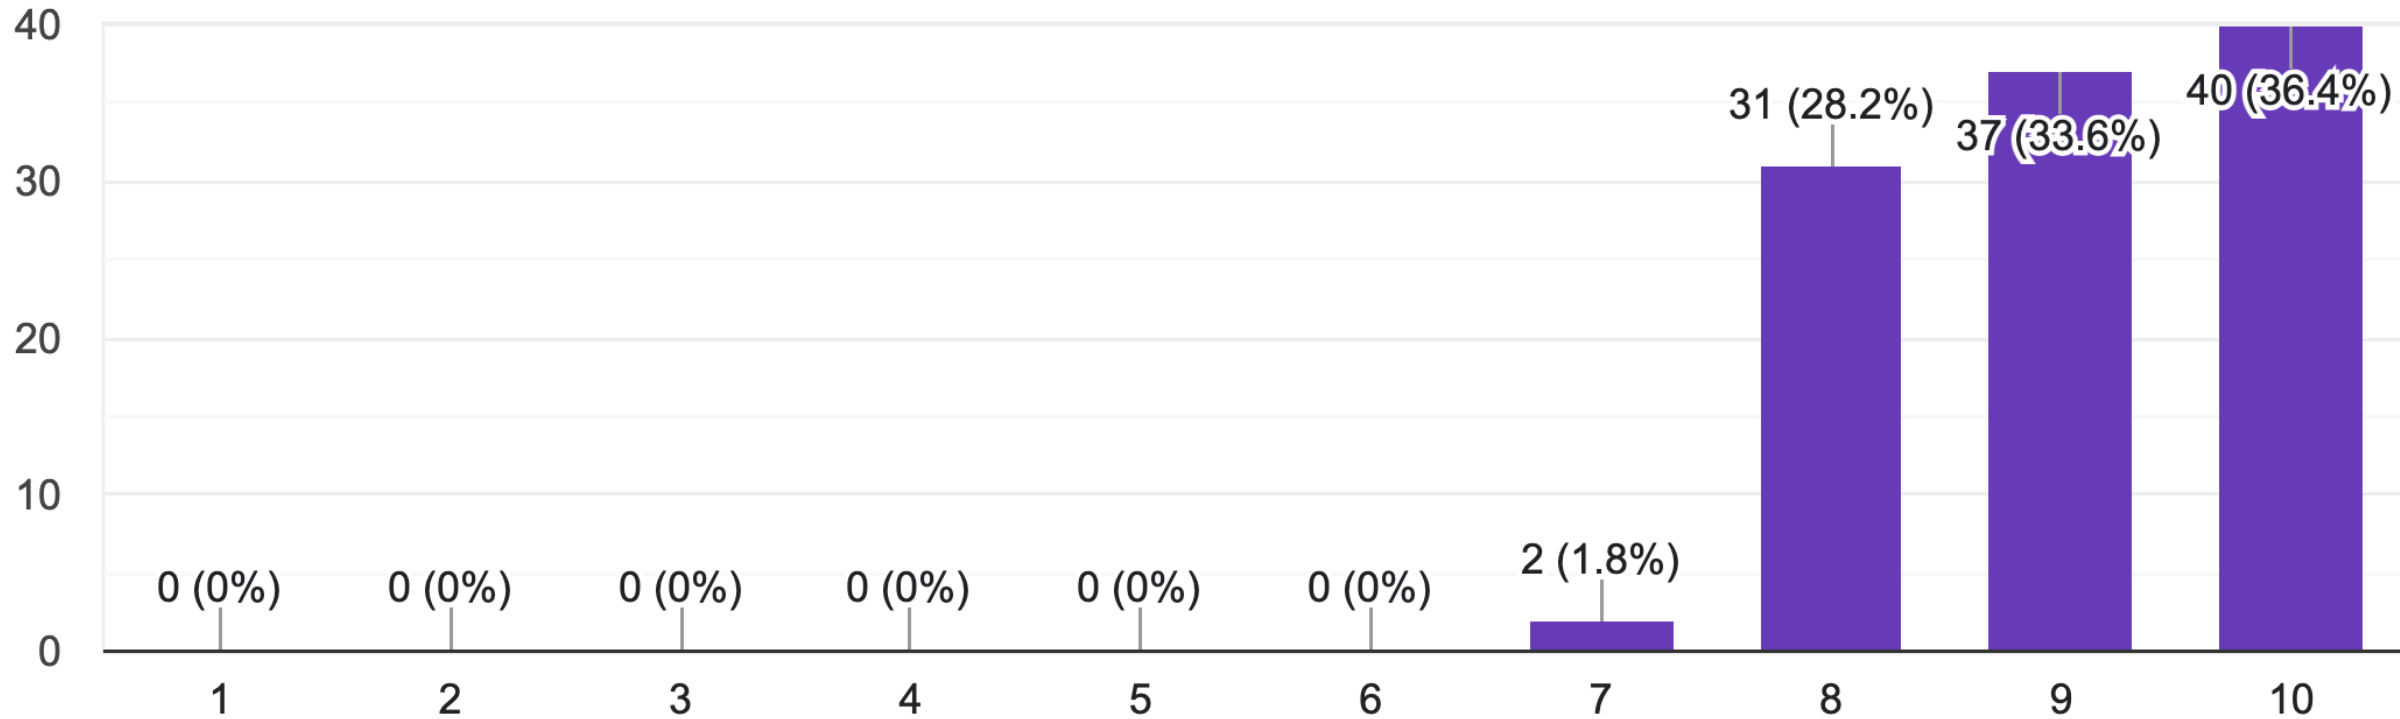

I would recommend this webinar series to fellow healthcare professionals.

110 responses

# How would you rate today's webinar?

110 responses

# What is the best part of the webinar?

Poll questions, canan bir's presentation, anesthesia and analgesia regime on neuroblastoma patients

All the best

Question and Answer

Perioperative

Neuroblastoma

2

The survey

Online olmasi

Aside from the informative presentations of our doctors, the question and answer portion made it perfect. The presenters were all knowledgeable and ready to answer the audience's queries.

Prrfect

First. Canan Bor's speak, Second Dr R Doctor's speak

topic discussion

Short and Focused Presentations. Sufficient Q&A time

Radiotherapy

easy access with a short session

Straightforwardly presentation

Topic about "Perioperative management of an infant with neuroblastoma" of Dr Canan Bor

Answering questions

All

3rd part

Discussion

Good

Talk on perioperative menagement of an infant with neuroblastoma by Dr Canan BOR

Perioperative management of an infant with neuroblastoma

The detailed management of patients with neuroblastoma

None

The lecture was very interesting. Speakers were very knowledgeable with thier topics

All

Q&A

I enjoyed Q&A session

Topic selected and resource persons

Q&A

Q&A

Iterative Anaesthesia new insights

Anesthesia for neuroblastoma

Love the Q and A..

# How can we improve ASPA-FLEX webinar series?

More video imaging more pre and postquestions

Take regularly

Its just fine

Olduğu haliyle gayet iyi bence

I experienced some technical difficulties during the presentation. At one point the audio and video paused for a bit but luckily it was only during one of the introductions of the presenter. I also got disconnected multiple times but that may be due to my internet connection.

Flex activieties are excellent in my opinion. Thanks a lot to ASPA

more discussion

Q&A sessions could be more interactive by allowing a certain number of attenders to actively participate. (for example 20-30 people who at registration also registered for interactive participation during discussion. Also maybe including some other experts on the topic who could help the discussion to get more lively)

Enjoying it as it is

Accessibility to more people can be increased by increasing online participation. Subject headings and being online make participation easier.

Frequent reminder of schedule

Nowadays media help us to get news

None

Excellent already

Let lecture video finish before thanking speaker

Demo-video

Good

Perfect 🥰

webinars were very effective

Better audio

None

Nil

Nil

Nil

It's going good

We hope there is interaction with audience

Love the case presentation related to the topic discussed

All are well n good

Nil

nil

None

Applicable knowledge and skills in daily practice

more interactive

More speakers

Pain management more and other cancer surgery

None

Great

Good to invite speakers from Africa to present paediatric cases

# What other topics would you like to be discussed in subsequent webinars?

n/a

Pediatric brain surgery

Management anaesthesia in Retinopathy of Prematurity (ROP)

Anesthesia for chairside dental procedures

Thoracic surgery

Suprised me

Ameliyathanede stres yönetimi

pediatric vertebrae surgeries, blood manegement and antifibrinolytic use

ACLS

One-Lung ventilation in Children

Pain Medicine in pedia

anaesthesia for outpatient paediatric outpatient

Other techniques for pedia anesthesia

May be topic about "Management of difficut airway"

Good

preoperative patient evaluation

Pediatric palliative care

ultrasound cases for anesthesia

Neonate and pediatrics resuscitation

Pediatric ICU sedation and relaxant cont inf

Use of dexmedetomidine in children

Non cardiac surgery in children with heart disease

Pediatric trauma,Regional anaesthesia.

MRI CT Sedation

Anesthesia with cardiovascular deseases

PEDIATRIC KVC
